

NEHP, Inc.
A Critical Process Systems Company

Simplifying Process Utilities

Service Solutions

Piping System Installation

This turnkey piping system installation is a quality example of the onsite services performed by NEHP. We were contracted to design, install and commission the bulk chemical distribution system piping for a Solar Cell Manufacturing Facility. This system is all double-jacketed piping for Sulphuric Acid, Sodium Hypochlorite, Sodium Hydroxide, Sodium Sulphite & Sodium Chloride.

We work with stainless steel and plastics. We offer our customers the option to prefabricate and ship pieces for installation by others; or to have NEHP provide a complete product with field installation by NEHP for a straightforward product solution.

Innovative solutions
for all your **critical process** needs
